What makes you passionate about using colour therapy puncture? What are your clients saying about you?

I have practiced using the wonderful modality of color-puncture for 24 years in my clinics to assist people with various health conditions. I specialize in addressing deep seated and long standing issues using Color-puncture for: Depression, Anxiety, Chronic Fatigue Syndrome, Stress Management, Hormonal Imbalances, Detoxification, and clearing post traumatic experiences from the body's cellular memory.

I am passionate about this healing modality and have been from the onset due to the fact that it incorporates the universal principles of healing, using the light spectrum together with the ancient knowledge of acupuncture to stimulate the body to rebalance and harmonize gently yet powerfully.

The medium of light stimulates a patient to gain access to their causation of symptoms they may be experiencing, therefore bringing greater inner awareness so that they may consciously release the blockages that created the state of disease in the first place. At a deeper somatic level color-puncture enables a person to reach their true potential to live their life being truer to themselves and therefore reach a level of personal power that is transformative.

True healing takes place when the spiritual; mental; emotional and physical parts of us are brought into alignment. Because we are an energetic light body in totality, moving at differing frequencies and influenced by universal energies such as Electro Magnetic Radiation, Gamma Rays, Microwaves, and the solar light frequencies, Color-puncture uses the power of light onto acupuncture points and zones on the body to cause shifts and balance the electro-magnetic circuitry which is what our bodies are.

Color-puncture is the 21st Century healing modality and I am proud to have the privilege to be working all these years with this wonderful tool that provides holistic healing on all levels for our wellbeing.
