What makes you passionate about using colour therapy puncture? What are your clients saying about you?

Working with colour puncture since 1996, I have a fascination with colour and light. Colour puncture being a drug free, gentle, painless and non-invasive therapy has helped many of my clients, family and myself. Children also love the colour and lights and are happy to experience the treatments with positive improvement changes to follow. The holistic approach of the Esoteric Medicine and the wide range of proven treatments have helped many of my clients and treatment results has never ceased to surprise me in recognising the healing power of colour & light. Feedback from Clients have been amazing, feedback of improvements – shifting blockages and noticing changes of the bodies reaction as part of the treatment or afterwards, as the treatment keeps working within. Colour puncture can and will help people with an open heart and open mind!
