About Paula

I feel fortunate to have found Esogetic therapy and to be able to share this modality and its benefits in my practice. I love that it is non-invasive and suitable for any age from newborn to eighty plus. The influence of colour in our lives is often forgotten and I feel blessed to be able to bring colour into peoples lives in such a unique way and witness the benefit and change it can bring.

I wish rainbows of healing for anyone who is lucky enough to introduce colour puncture and Esogetic healing into their lives.
